SITUATION SUMMARY

7.8 Magnitude Earthquake, Kathmandu, Nepal (Final)

- In response to Nepal's request for urban search and rescue (US&R) assistance the United States State Department, U.S. Agency for International Development's, Office of Foreign Disaster Assistance (USAID/OFDA) deployed two INSARAG-Classified Medium US&R teams: Fairfax County, VA (VA-TF1, identified by USAID/OFDA as USA-1), consisting of 54 personnel to include six Canine Search Teams; and Los Angeles County, CA (CA-TF2, identified by USAID/OFDA as USA-2), consisting of 57 personnel to include six Canine Search Teams. USA-1 and USA-2 are operating in Nepal at this time.
- On 05/12/15 at 0005 hours, a verified 7.3 magnitude EQ occurred 52 miles east of Kathmandu, Nepal. Multiple aftershocks have occurred ranging from magnitudes 5.6 to 4.2.
- Per Fire Division, both US&R Task Forces assigned for duty in Nepal have been accounted for and are well.
- **Per the Cal OES Fire Duty Officer and LA County Fire: USA-2 returned to Los Angeles from Nepal on 05/15/15.**

Amgen Tour, May 10-17, 2015

- The eight-stage, 724-mile Amgen Tour began 05/10/15 in Sacramento and will finish in Pasadena on 05/17/15.
- The tour will roll into Southern California on 05/14/15 during a 98-mile stage from Santa Barbara to Santa Clarita before heading to Big Bear on 05/15/15 for an individual time trial.
- From Big Bear, a grueling, 80-mile trek from Ontario to a summit finish at Mt. Baldy will mark the race's penultimate stage. The final day will see the riders depart L.A. Live in downtown Los Angeles for a 60-mile stage which ends at the Rose Bowl in Pasadena.

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

- There are no significant Watches or Warnings in effect at this time

Active Weather Warnings, Watches and Advisories by County: http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

A series of upper low pressure systems will bring scattered showers and isolated thunderstorms to mainly the interior each afternoon and evening through the middle of next week.

Medford Weather:

A few showers are possible along the southern edge of the forecast area today but thunderstorms are unlikely. A fairly significant wave will approach the region on Sunday as a low closes off west of central California. This will result in showers and the slight chance of thunderstorms in all areas but the coast and Umpqua Basin starting Sunday afternoon. The low slowly drifts over California on Monday keeping the area in a wet pattern until Thursday or Friday.

Reno Weather:

Sierra fog, light valley rain, and mountain snow will continue through early this morning. Weak high pressure transits Nevada today with lower chances of showers compared to previous days. Another round of snow is expected for the higher elevations of the Sierra with rain showers across western Nevada late this weekend as a warmer system moves into the region. More unsettled weather is on tap for next week.

San Francisco Weather:

Below normal temperatures are forecast to persist well into next week, especially inland, as a large scale upper level trough remains parked near the West Coast. Generally dry conditions are expected throughout the forecast period. However, the possibility cannot be completely ruled out of a shower or isolated thunderstorm, especially over the higher terrain near the region's eastern boundary, on Monday when the center of the next upper level disturbance is projected to move through.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Variable clouds and mainly mountain showers or thunderstorms through the coming week as a series of weak low pressure systems move across California. Daytime highs around normal through the middle of next week and then some warming for the second half of the week.

Hanford Weather:

A series of low pressure systems will affect the region for the next several days. Showers, snow showers, and thunderstorms will continue over the Sierra on a daily basis through early next week.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Weak high pressure will bring drier and slightly warmer conditions to the area for the weekend. A couple of upper level low pressure systems will move through Southern California next week. Continued cool weather with onshore breezes and marine layer low clouds during the night and morning hours can be expected through the week.

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

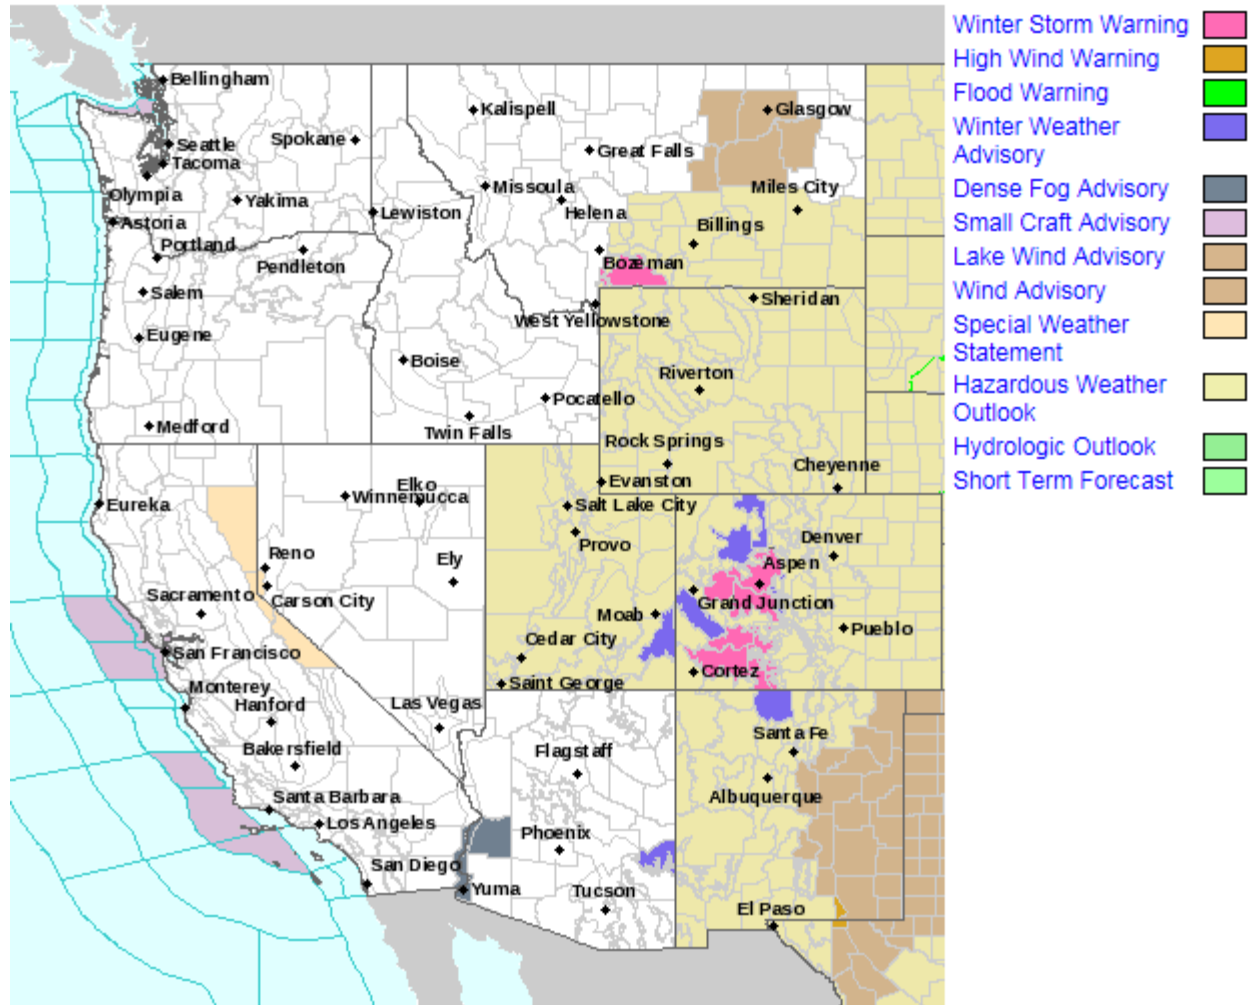

Weak high pressure will bring drying and slow warming through Sunday. For Monday through Friday, a series of weak low pressure systems will maintain below average inland temperatures, a deeper marine layer with areas of night and morning low clouds and fog extending onto the coastal mountain slopes with slow daytime clearing, and stronger onshore flow with periods of gusty west winds in the mountains and deserts.

Southeast California Weather:

Afternoon temperatures in the Lower Deserts today will range from 75 to 80 degrees, or 15 degrees below normal. Dry and warmer weather is expected Sunday; however, a Pacific low pressure system is forecast to move into the region on Monday resulting in gusty winds and a slight chance of showers. Dry and warmer weather will return next Tuesday through Friday.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC, Inland, Coastal, and Southern REOCs and the Santa Barbara County EOC are activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Regional (Inland, Coastal, Southern) conference calls continue to occur on a weekly basis.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought
